Profile

I recently graduated with a degree in Computer Engineering from ISCTE, where I gained proficiency in Java, Python, C, SQL, and Outsystems, as well as web development with HTML5, CSS, and JavaScript. My passion for technology began in high school through the "Apps For Goods" competition, where I worked on projects with mentors from BNP Paribas, Microsoft, and Galp.

As a freelance developer, I gained hands-on experience in both front-end and back-end development. My academic and professional experiences have equipped me with a strong technical background and a keen understanding of the product development cycle.

Outside of academics, I am an active sports enthusiast and have represented ISCTE in Taekwondo at the European University Games. My participation in sports like basketball, volleyball, Taekwondo, Karate, and Judo has strengthened my teamwork, focus, and independent work ethic.

I am now excited to pursue a Master's degree in Data Science at NOVA IMS to further my knowledge in data analysis, machine learning, and artificial intelligence. I aim to leverage my skills to solve complex problems and contribute to positive societal change through technology.

Employment History

Summer Camp Monitor, Cascais Ambiente, Cascais

JUNE 2022 – AUGUST 2022

Education

High school, Escola Secundária Quinta do Marquês

SEPTEMBER 2018 – JULY 2021
